MSU IND MIXER-SETTLER UNITS – INDUSTRIAL EQUIPMENT

The industrial mixer-settler units are equipped with AC-motors and adjustable frequency converters for mixer speed control. This type of equipment is commonly used as pilot plant equipment (process testing and demonstration) and in bigger scale as production equipment. The units are offered separately or integrated in complete process arrangements. Tailor-made units (equipment of special sizes and materials) are produced on request.

A complete range of standard MSU IND mixer-settler sizes is available.

Size (type SQ)	MSU-15	MSU-100	MSU-500	MSU-2K	MSU-4,5K
Construction material	Thermoplastic		Glass Fibre Armed Plastic or 316L		
Recommended flow (org+aq+recycle), l/h at 2,5 m/h loading	200	825	2500	6400	12000
Mixer active volume	6	27	125	500	1000
Settler active volume	15	100	500	2000	4500
